Wired networks are also called as _____network.	Token bus	star	ethernet	wireless
IEEE developed _____standard for ethernet.	802.3	802.11	802.15	802.16
A standard etherret network can transmit data at a rate upto _____.	100mbps	1mbps	10mbps	none
10 Base2 also known as _____	thick ethernet	twist ethernet	thin ethernet	shield ethernet
10 Base5 also known as _____.	thick ethernet	twist ethernet	thin ethernet	shield ethernet
IEEE 802.11 standard is known for---------LANs.	wired	all	wireless	bluetooth
_____ multiple access technique is used by IEEE 802.11 standard for wireless LAN?	CDMA	CSMA/CA	ALOHA	CSMA/CD
In wireless ad-hoc network _____	Access point is not required	Access point is must	Nodes are not required	All nodes are access points
A BSS without AP is also called as-----------architecture.	ad hoc	infrastructure	home	business
A BSS with an AP is also called as-----------network.	ad hoc	infrastructure	home	business
_____ of the following is not correct in relation to multi-destination routing?	Is same as broadcast routing	Contains the list of all destinations	Data is not sent by packets	There are multiple receivers
_____one of the following algorithm is not used for congestion control?	Traffic aware routing	Admission control	Load shedding	Routing information protocol

Item Bank Name

The network layer protocol for internet is _____	Ethernet	Internet protocol	Hypertext transfer protocol	File transfer protocol
For delivery of packet, we require_____addressing .	physical & logical	physical & port	logical & port	physical & special
ARP protocol is used for mapping_____address to_____address.	logical ,physical	physical , logical	physical , port	logical, special
A _____is a TCP name for a transport service access point.	Port	Pipe	Node	Protocol
Transport layer protocols deals with _____	Application to application communication	Process to process communication	NNode to node communication	Man to man communication
_____of the following is a transport layer protocol?	Stream control transmission protocol	Internet control message protocol	Neighbor discovery protocol	Dynamic host configuration protocol
When displaying a web page, the application layer uses the _____	HTTP protocol	FTP protocol	SMTP protocol	TCP protocol
_____ of the following allows a user at one site to establish a connection to another site and then pass keystrokes from local host to remote host?	HTTP	FTP	Telnet	TCP
